Career Objective

Aspiring Software Engineer with strong foundations in Java, data structures, object-oriented programming, databases, and full-stack development. Seeking to apply problem-solving and software development skills to build reliable and scalable software solutions.

Technical Skills

Programming Languages: Java, C, Python, JavaScript

Backend Frameworks: Spring Boot, Node.js, Express.js, Servlets, JDBC

Frontend: React.js, HTML5, CSS, jQuery, AJAX

Databases & ORM: MongoDB, MySQL, PostgreSQL, Hibernate, JPA, Mongoose

API Testing & Tools: REST APIs, Postman, Axios, Git, GitHub, VS Code, MongoDB Compass

Internships

Java Full Stack Development Intern

May 2025 – Jul 2025

Shikhara Embedded Solutions Pvt. Ltd., Hyderabad

- Developed Java applications using Core Java, JDBC and MySQL for application and database management.
- Implemented CRUD operations and integrated backend modules with MySQL for efficient data handling.
- Collaborated with the development team to build, test and debug application features based on requirements.

Mobile App Development Intern (Flutter)

May 2026 – Jun 2026

Council for Skills and Competencies (CSC India – APSCHE)

- Developed cross-platform mobile applications using Flutter and Dart with responsive user interfaces.
- Built responsive mobile interfaces using Flutter widgets and implemented features based on requirements.

Projects

FinPay: FinTech Transaction System

Java | Spring Boot | Spring Security | JPA/Hibernate | MySQL | React

- Developed a full-stack digital wallet with JWT authentication, wallet management, secure money transfers, and transaction history.
- Implemented reliable transactions using @Transactional, optimistic locking, idempotency keys, BCrypt hashing, validation, and exception handling.

StaySphere: Full-Stack Property Management Platform

Node.js | Express.js | MongoDB | Mongoose | EJS

- Developed a property management platform with REST APIs, CRUD operations, authentication, RBAC, listings, and protected routes.
- Implemented User/Host roles, image handling, favorites with automatic reference cleanup, and MongoDB frontend-backend integration.

DeepFake Image & Video Detection System

Python | TensorFlow | OpenCV | FastAPI | React | MobileNetV2

- Developed a web application for detecting manipulated images and videos using YuNet face detection and MobileNetV2 transfer learning.
- Built sampled-frame inference with confidence-based results for real/fake classification, achieving approximately 85% test accuracy.

Education

Lakireddy Bali Reddy College of Engineering

2023–2027

B.Tech in Computer Science and Information Technology – CGPA: 9.40

Sri Srinivasa Junior College

2021–2023

Intermediate – 97.1%

Sri Chaitanya School

2020–2021

SSC – 100%

Certifications

- AWS Certified Cloud Practitioner
- Oracle Generative AI Professional Certification
- Introduction to Industry 4.0 and IIoT – NPTEL (2026)
- Cloud Computing Essentials – Infosys Springboard (2024)

Achievements & Activities

- Secured 1st Position in Academics.
- Received Special Appreciation in the HackIT Hackathon.
- Organized a C Programming Bootcamp.
- Student Coordinator for college technical events.
- Participated in NSS community service activities.
